

CARD 01

Boundary check

Ask: Is the left side a complete sentence? Is the right side a complete sentence?

CARD 02

Two complete sentences

Use a period, semicolon, or comma + FANBOYS. A comma alone creates a comma splice.

CARD 03

Semicolon test

Replace the semicolon with a period. If the period works, the semicolon can work.

CARD 04

Colon test

The words before a colon must form a complete sentence. The colon introduces an explanation, example, or list.

CARD 05

Paired dashes

Treat paired dashes like parentheses. Remove the interruption and test the base sentence.

CARD 06

Single dash

A single dash can introduce an explanation or sharp elaboration after a complete thought.

CARD 07

Subject-verb agreement

Strip away phrases between the subject and verb. Match the verb to the true subject.

CARD 08

Modifier check

Ask who is doing the opening action. That person or thing should appear immediately after the comma.

CARD 09

Verb tense

Find the timeline anchor: previously, since, by the time, currently, later, or a date.

CARD 10

Parallel structure

Items in a series should use the same grammatical form: running, swimming, and cycling.

CARD 11

Pronoun check

Identify the exact noun the pronoun replaces. Confirm number and clarity.

CARD 12

Transition question

Name the relationship first: same direction, contrast, cause, example, or sequence.

CARD 13

Rhetorical synthesis

Read the goal first. Use only the notes that accomplish that exact goal.

CARD 14

Provable beats plausible

Choose what the passage supports, not what sounds reasonable or matches outside knowledge.

CARD 15

Down to two

Find the exact word that makes one choice wrong.

CARD 16

Extreme language

Treat all, never, proves, must, and entirely with suspicion unless the passage supports that strength.

CARD 17

Cause vs. correlation

An association does not prove that one factor caused the other.

CARD 18

Inference

Choose the smallest defensible conclusion, often phrased with may, suggests, or is consistent with.

CARD 19

Command of evidence

State the claim first. Then predict the result that would support or weaken it.

CARD 20

Graph or table

Read title, axes, units, groups, and trend before interpreting the surrounding passage.

CARD 21

Words in context

Predict a simple replacement before reading the choices.

CARD 22

Function question

Ask why the author placed the sentence there, not merely what the sentence says.

CARD 23

Two-text question

Reduce Text 1 and Text 2 to one sentence each. Then decide agree, disagree, qualify, or support.

CARD 24

90-second rule

At about 90 seconds: choose the best answer, flag it, and protect the rest of the module.

CARD 25

Hard Module 2

If it suddenly feels difficult, stay calm. Simplify the passage and harvest every available point.
