

SAT Reading and Writing

Your 590 → 600+ Game Plan

A two-day strategy for cleaner grammar, stronger evidence,
and calmer execution

USE THIS ONCE. DRILL THE CARDS. CARRY THE PLAYBOOK.

Student edition

590

CURRENT SCORE

Your score profile is moving in the right direction

The reading gains are real. Grammar became the clearest short-term opportunity.

DOMAIN	TEST 1 • 580	TEST 2 • 590	
Information & Ideas	490–540	610–670	MAJOR GAIN
Craft & Structure	490–540	550–600	GAIN
Expression of Ideas	680–800	610–670	STILL STRONG
Standard English Conventions	550–600	490–540	PRIORITY

The mission for this weekend

Keep the reading improvement. Stop giving points back in grammar and execution.

1

Make grammar reliable

Turn repeatable rules into banked points.

2

Preserve the reading gains

Use the same approach, plus stricter textual proof.

3

Control the clock

At 90 seconds, choose, flag, and move.

The test does not require every hard question. It rewards control of the questions you can solve.

Where to spend the remaining prep time

Attack the leaking bucket without resetting what already works.

45%	Standard English Conventions	Boundaries, colons, dashes, agreement, modifiers, tense
25%	Craft & Structure	Words in context, function, and two-text relationships
20%	Information & Ideas	Inference, evidence, data, and scope
10%	Expression of Ideas	Maintain transitions and rhetorical synthesis

Grammar starts with sentence structure

Do not choose punctuation by sound. Identify what exists on each side of the blank.

Complete sentence on the left?

YES Check the right side

NO Do not use a colon yet

COMPLETE + COMPLETE

Period
Semicolon
Comma + FANBOYS

COMPLETE + EXPLANATION

Colon
Single dash

SEMICOLON = PERIOD • If a period fails, the semicolon fails.

Reading rewards proof, not plausibility

The strongest upgrade: demand evidence when two answers both sound reasonable.

PASSAGE PROVES

**Plants receiving Q
produced 18% more
root growth.**

Smallest safe conclusion:

Q may promote root growth.

TRAP ADDS

**Q is necessary
for root growth.**

The passage never proved necessity.

Ask: “Could I prove this using only the passage?”

When two choices remain, hunt for the defect

One wrong word can ruin an otherwise attractive answer.

some

vs.

all

may

vs.

must

associated

vs.

causes

supports

vs.

proves

one study

vs.

research generally

describes

vs.

explains why

Stop asking “Which sounds better?” Ask “What specifically makes one wrong?”

Fast playbook by question type

Reduce each question to one job before you solve it.

INFERENCE

Smallest conclusion the passage supports.

EVIDENCE

State the claim. Predict the result that supports it.

GRAPH

Title, axes, units, groups, trend, question.

VOCABULARY

Predict a simple word before viewing choices.

FUNCTION

Why did the author put this sentence here?

TWO TEXTS

Text 1 = X. Text 2 = Y. Compare.

Module strategy changes after the route adapts

Module 1 protects points. A hard Module 2 requires selective harvesting.

MODULE 1

PROTECT

- Bank transitions and synthesis
- Slow down for grammar structure
- Use evidence on reading
- Save 4–5 minutes for review

HARD MODULE 2

HARVEST

- Expect dense passages
- Ignore unnecessary jargon
- Take the hard questions that fit you
- Guess intelligently and move

If Module 2 feels harder: good. Stay calm and keep playing.

SATURDAY

Your job is to answer the question.

GRAMMAR

Structure before sound

READING

Provable before plausible

CLOCK

90 seconds, then flag

HARD MODULE 2

Simplify and harvest

YOU DO NOT NEED TO UNDERSTAND EVERYTHING.

Answer everything. Protect the points you can control.
